Granitestone Premiere

Granitestone Premiere is priced the same as the original Granitestone. Use the fourth column in the price book as before.

The Granitestone Premiere colors are shown with our new Deco Metal Flakes which are slightly larger, shinier and more closely replicate the metal fragments found in natural granite. The Marblestone Series samples are shown as before with our Mica Chips. All Granitestone Premiere colors are available with your choice of either Platinum (silver) or Gold Deco Metal Flakes except for Copper Mountain which is only available with the copper flakes as shown.

The colors in the Granitestone Premiere and Marblestone Series are available in a gloss or matte finish except for Black Galaxy and Copper Mountain which are only available in gloss. In these two series there is no extra charge for a matte finish.

All the colors on the Granitestone Premiere/Marblestone Series sample boards may be ordered without the metal flakes. Simply replace the last letter in the color number with the letter N in place of P, G, B or S. Copper Mountain is only available with the inclusion of the copper flakes.

You now have a choice of three different types of metal flakes that we can add to any of our colors with the exception of the three solid colors at the very top of our Standard Marble board. To order the three different metal flakes follow these instructions. For Reflections add to the end of the color number RS-N for Nickel or RS-G for Gold. For Mica Chips add MC-S for Silver or MC-B for Brass. To add Deco Metal Flakes add DMF-P for Platinum or DMF-G for Gold to the end of the color number. Adding Deco Metal Flakes to any color is the same cost as adding Mica Chips. You can find pricing on page 4 in our price book.

The original Granitestone Series colors will still be available for awhile and you will receive notice approximately 2-3 months in advance before they are discontinued.
