

Granitecast Series

We are introducing nine new colors to our Granitecast Series. The colors we are replacing will still be available for quite awhile so you may still order any of these colors being replaced until further notice.

New Colors now available

GRC03	Blizzard
GRC24	Cascade
GRC06	Snowcap
GRC80	Twilight
GRC21	Sea Oats
GRC28	Warm Sand
GRC52	Baja Sand
GRC22	Beach Sand
GRC29	Stoneware

Colors eventually being replaced

GRC07	Frost
GRC04	Vanilla Cream
GRC19	Sedona
GRC54	Caramel
GRC55	Butterscotch
GRC43	Sand Dune
GRC61	Cilantro
GRC49	Terra Cotta
GRC84	Cloud

The Granitecast Series as well as Granitestone and Granitestone Premiere is our hardest, most durable surface which consists of a composite solid surface material. With the exception of a few colors they are now available with a gloss or matte finish. Also, the customer may add any of our three types of metal chips if desired.

Our REFLECTIONS are small particles of either nickel or gold that have a bright sparkle.

MICA CHIPS are mostly medium size metal chips that have a slightly duller finish in brass or silver.

Our new DECO METAL FLAKES come in platinum (silver) or gold and have medium and large particle size flakes with a brilliant sparkle.

Any of these can now be added to any of our colors with the exception of the three solid colors at the top of our standard marble board. Deco Metal Flakes, when added, are the same price as Mica Chips on page 4 of our price book.

In order to add these metal particles to a color, follow these instructions: For Reflections add to the end of the color number RS-N for Nickel or RS-G for Gold. For Mica Chips add MC-S for Silver or MC-B for Brass. To add Deco Metal Flakes add DMF-P for Platinum or DMF-G for Gold to the end of the color number.
